Develop and revise reports and training material for existing IAEA projects on occupational radiation protection in the area of NORM as required, e.g. the development of safety reports related to occupational radiation protection in some sectors of NORM industries.

Profile:
- Advanced university degree (Masters’ or equivalent) in the field of physical or chemical sciences or radiation protection.
- At least 7 years’ experience in radiation safety, including at least 4 years’ experience in occupational radiation protection.
- Experience in the management of issues related to occupational radiation protection in the NORM industries, and/or
- Experience in the development of safety standards and/or practical guidance on occupational radiation protection and/or
- Experience in the application of international safety standards in developing countries desirable.
- Fluency in spoken and written English. Knowledge of French, Russian or Spanish would be an asset.

Remuneration:
The remuneration for the assignment is a daily fee of € 250-310, based on qualifications and experience. In case duty travel is required as part of the assignment, a daily subsistence allowance (DSA) and travel costs are provided.

Applications from qualified women and candidates from developing countries are encouraged.

To make an expression of interest in undertaking this consultancy opportunity, please submit a Personal History Form for this vacancy at the following link: [http://recruitment.iaea.org](http://recruitment.iaea.org). The IAEA retains the discretion not to make any appointment to this vacancy, to make an appointment at a lower grade or with a different contract type, or to make an appointment with a modified job description or for shorter duration than indicated above. Testing may be part of the recruitment process.
